DETAILED ACTION

Page 2

1. The rejection of claims 10 and 11 under 35 USC § 112, second paragraph and the rejection of claims 1, 2, 10 and 11 under 35 USC § 102(b) as being anticipated by Jacobine et al (U.S. Patent 5,167,882 A) set forth in the previous Office Action (mailed on 26 October 2005) have been overcome and are withdrawn.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

- (e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.
- 3. Claims 1, 5-8, 10 and 11 are rejected under 35
 U.S.C. 102(e) as being anticipated by either Moszner et al (U.S. Patent Application Publication 2002/0167100 A1) or Thies et al (U.S. Patent Application Publication 2004/0142274 A1) for the reasons of record.

Double Patenting

The nonstatutory double patenting rejection is based on a 4. judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple A nonstatutory obviousness-type double patenting rejection is appropriate where the conflicting claims are not identical, but at least one examined application claim is not patentably distinct from the reference claim(s) because the examined application claim is either anticipated by, or would have been obvious over, the reference claim(s). See, e.g., In re Berg, 140 F.3d 1428, 46 USPQ2d 1226 (Fed. Cir. 1998); In re Goodman, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); In re Longi, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); In re Van Ornum, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); In re Vogel, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and In re Thorington, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) or 1.321(d) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent either is shown to be commonly owned with this application, or claims an invention made as a result of activities undertaken within the scope of a joint research agreement.

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

5. Claims 1, 5-8, 10 and 11 are provisionally rejected on the ground of nonstatutory obviousness-type double patenting as being unpatentable over claims 16-27 of copending Application No. 10/623,270 in view of either Moszner et al (U.S. Patent Application Publication 2002/0167100 A1) or Thies et al (U.S. Patent Application Publication 2004/0142274 A1) for the reasons of record.

5

This is a <u>provisional</u> obviousness-type double patenting rejection.

Response to Arguments

- 6. Applicant's arguments filed on 30 January 2006 have been fully considered but they are not persuasive.
- Applicant argues (pages 5 and 6) that Moszner et al and Thies et al do not disclose, suggest or teach dispensing the initiator and the norbornene based build material independently from one another, and also do not disclose, suggest or teach dispensing the initiator and the norbornene based build material from different ink-jet printheads. Examiner responds that Moszner et al and Thies et al do teach these features (Moszner et al: paragraph [0013] ("double cartridges are available in connection with two component materials"), paragraph [0018] ("instead of a single nozzle, a plurality of nozzles may be deployed to apply various materials"), paragraphs [0060] and [0061] (norbornene based build materials and initiators; Thies et al: paragraph [0014] ("ink jet or multiple ink jet processes", "multiple materials"), paragraphs [0057], [0060], [0061], [0090] and [0101] (norbornene based build materials, polymerized or cured by initiators)).

Conclusion

8. THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Leo B. Tentoni whose telephone number is (571) 272-1209. The examiner can normally be reached on Monday - Friday (6:30 A.M. - 3:00 P.M.).

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Michael P. Colaianni can be reached on (571) 272-1196. The fax phone number for the
